Subject Please call Mike Oedenthal and tell him there is an issue of compliance with the label because of land zoning

Hi Chad,

The land that the School is on is zoned for a school. Nothing in the zoning in Lane County Code allows use of this land for commercial timber production. Therefore I think that the use of Arsenal Applicator's Concentrate is illegal. Paul Clements is trying to get an answer from Lane County Lane Management (Planning) Department about this apparent conflict of the School's land use. Being the New Year's holiday schedule, many offices are closed and we may not get an answer to this question until early next week.

I think it is appropriate to stay the spray operation which is scheduled for tomorrow morning so that Nick's Timber Service does not violate the label, and the School does not contract something that is illegal.

Can you help get this brief stay?
